

South Tyrol weather bulletin

Tuesday, 07.07.2026

Forecast for today, Tuesday 07.07.2026
 Sunny with high clouds

Reliability: 80 %

Forecast for today

Central Europe, and therefore the Alpine region as well, remains under the influence of a north-westerly upper-level flow. Tuesday will start off bright and sunny, with partly clear skies. During the day, high clouds will roll in; some of these may become quite thick and occasionally block out the sun a little. Temperatures are rising, reaching midsummer highs of 28° in Sterzing and 33° in Bolzano.

Outlook for the next days

Thursday 09.07.2026
 10° / 20° | 26° / 35°

Thursday will bring very sunny weather. Temperatures will rise a little further.

Friday 10.07.2026
 11° / 21° | 27° / 34°

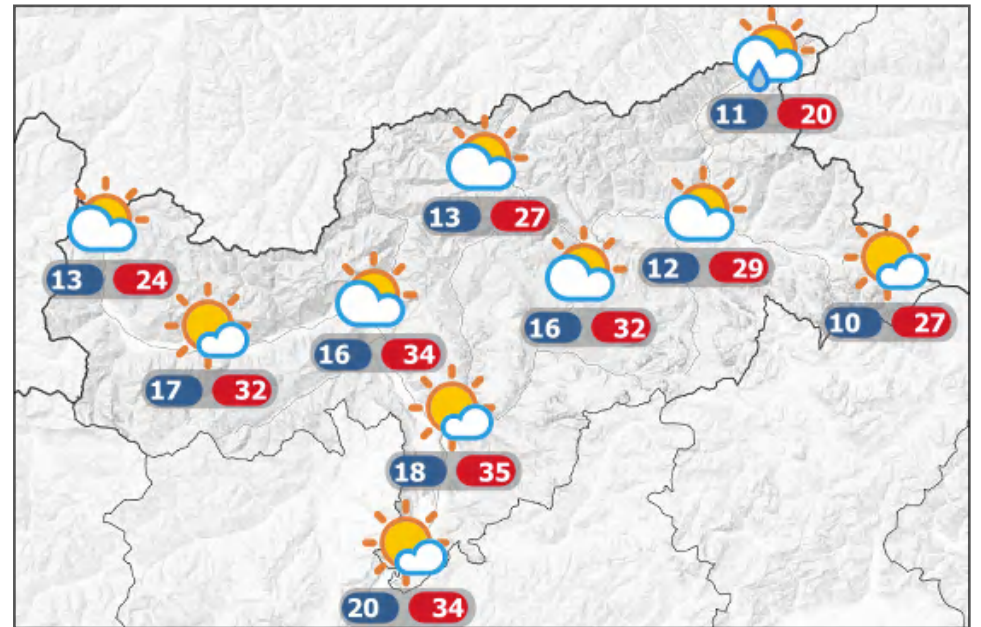

Friday will also bring plenty of sunshine in the first half of the day, though a few thunderstorms are expected in the afternoon.

Saturday 11.07.2026
 12° / 20° | 26° / 33°

On Saturday morning, the sun will shine widely, after which a few thunderstorms will develop.

Forecast for tomorrow, Wednesday 08.07.2026

Reliability: 80 %

Forecast for tomorrow

There will be plenty of sunshine on Wednesday too, with some medium- and high-level clouds passing through. There will be more clouds along the main ridge, and a few drops of rain may fall towards the Ahrntal in the afternoon.
